## Memberships & Playerlayer

- There have been many changes to the membership options, which some students, specially freshers may find confusing and overwhelming to understand. Thus, I would facilitate the understanding of the different segments of pricing with potential assistance from activity zone members.
- PlayerLayer is overpriced therefore I would work closely with our current regional account manager to help achieve discounted prices and deals.

### Participation

- Introduce a new STARS criteria which encompasses a cross society and club collaboration to increase participation in sports.
- Highlight the diversity within clubs through means of marketing to create a welcoming and inclusive atmosphere.

### Student Welfare

- Shift focus to all university students and not only those involved in Team Surrey during exam period by building on the current free sessions and possibly extending that to club's training sessions which generally drop in numbers during exam time.
- This additional taster session will help students cope better with exam stress and may encourage them to join a club and become a part of the Team Surrey family.

---

## Background

### Who?

I am a Final year Law and International Studies student and the current President of the University of Surrey Women's Football Club. I was previously the social secretary for the club which helped me gain the confidence I need to run for a bigger role.

### What?

I am eager to work with Team Surrey and the Student's Union to increase participation in sports, from beginners who want to try something new to those to wish to play competitively at a high level. I believe that Team Surrey tailor well to both sides of the spectrum; however, it is important to make people aware of that, which is one of the main things I would like to focus on.
